<sup>A</sup>Maximum working pressure based on 1/8" O.D. dead soft copper tubing. Please consult Imperial Eastman for additional information.

# General Information

## Thread Size Chart

Use this chart to determine fitting thread sizes per tube O.D. size.

**For example:** Thread sizes for a Hi-Duty® 1/8" fitting, with Part No. 88LB02X02 are: .5/16-24 tube thread size x 1/8-27 pipe thread size, as below:

**PART NUMBER = 88LB02X02**

### TUBE SIZE (O.D.)

	"Dash" No.	- 02	- 03	- 04	- 05	- 06	- 07	- 08	- 10	- 12	- 14	- 16
FITTINGS	Size	1/8"	3/16"	1/4"	5/16"	3/8"	7/16"	1/2"	5/8"	3/4"	7/8"	1"

### TUBE END THREADS

Hi-Duty®	5/16-24	3/8-24	7/16-24	1/2-20	9/16-20		11/16-16	7/8-18	1-18	1 1/4-18	
45° Flare	5/16-24	3/8-24	7/16-20	1/2-20	5/8-18	11/16-16	3/4-16	7/8-14	1 1/16-14	1 1/4-12	
CompresaMatic®	5/16-24	3/8-24	7/16-24	1/2-24	9/16-24	5/8-24	11/16-20	13/16-18	1-18		
Compression	5/16-24	3/8-24	7/16-24	1/2-24	9/16-24	5/8-24	11/16-20	13/16-18	1-18

# General Information

## Assembly Instructions

Fitting	To Assemble	To Reconnect
Hi-Duty® Flareless Tube Fittings	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tube squarely and cleanly, removing all burrs.</li><li>2. Grasp fitting. Do not remove nut.</li><li>3. Insert tube in fitting through nut until tube seats firmly against tube shoulder in body.</li><li>4. Grip tube firmly to prevent turning and tighten nut until a slight “give” is felt. This “give” indicates the sleeve has been sheared from the nut.</li><li>5. Continue tightening for one and one-half additional turns for a positive, leakproof seal. It is not necessary to tighten the nut all the way down.</li></ol>	<ol style="list-style-type: none"><li>1. Reinsert tubing</li><li>2. Tighten nut one eighth of a turn more than previous make-up. NOTE: The Hi-Duty® fitting can be disconnected and reconnected repeatedly and will always reconnect tightly.</li></ol>
45° Flare Tube Fittings	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tubing squarely and cleanly, removing all burrs.</li><li>2. Slide nut onto tubing with the open threaded end of the nut facing toward the end to be flared.</li><li>3. Flare tubing end with a good quality flaring tool.</li><li>4. Position the flare against the nose of the fitting body and align the tube with the fitting.</li><li>5. Assemble nut to body, tightening finger tight.</li><li>6. Tighten nut with a wrench one-quarter to one-half turn for a leakproof connection.</li></ol>	<ol style="list-style-type: none"><li>1. Tighten to original make-up position, plus an additional one-sixth turn of the nut (one flat of the hex).</li></ol>
Compression Flareless Tube Fittings	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tube squarely and cleanly, removing all burrs.</li><li>2. Insert tubing into the fitting body until it rests against the shoulder.</li><li>3. Move sleeve into position and tighten the nut. NOTE: No flaring, soldering or other special preparation of the tubing is necessary before assembly.</li></ol>	<ol style="list-style-type: none"><li>1. Tighten to original make-up position, plus an additional one-sixth turn of the nut (one flat of the hex).</li></ol>
CompresaMatic™	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tube squarely and cleanly, removing all burrs.</li><li>2. Insert the tube into fitting. Be sure the tube “bottoms” on the fitting shoulder.</li><li>3. Tighten (hand-tight), and complete the seal with <b>one</b> wrench turn on all sizes.</li></ol>	<ol style="list-style-type: none"><li>1. Tighten to original make-up position, plus an additional one sixth turn of the nut (one flat of the hex).</li></ol>
Poly-Flo® Flareless Tube Fittings	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tubing squarely and cleanly, removing all burrs.</li><li>2. Push tubing into fitting and tighten the nut. NOTE: There is no need to disassemble the fitting before assembly. When used with Poly-Flo® or PVC tubing, fitting is assembled finger tight. No wrenches needed.</li></ol>	<ol style="list-style-type: none"><li>1. Tighten nut to original make-up position, tightening finger tight.</li></ol>
Poly-Flo® Kwik-Connect Couplers	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tubing squarely and cleanly, removing all burrs.</li><li>2. Push tubing into fitting and tighten the nut. NOTE: There is no need to disassemble the fitting before assembly. When used with Poly-Flo® or PVC tubing, assembly is finger tight.</li></ol>	<ol style="list-style-type: none"><li>1. Tighten nut to original make-up position, tightening finger tight.</li></ol>
OmegaFlo™ Push-to-Connect/ Push-to-Release Pneumatic Fittings	<ol style="list-style-type: none"><li>1. Using a tube cutter, cut tubing cleanly and squarely.</li><li>2. Firmly push the tubing into the fitting until it will enter no further. A properly assembled tube cannot be pulled out by hand.</li><li>3. To disconnect, simply push back on the brass collet and release tubing.</li></ol>	<ol style="list-style-type: none"><li>1. Firmly push tubing into the fitting until it will enter no further. A properly assembled tube cannot be pulled out by hand.</li></ol>
